THE NEXT GENERATION SERIES®

shown in dove grey and black with smooth t-mold/3mm edge

- a) executive "U" groups shown back to back.
- b) executive "U" groups shown mirror imaged with a half table
- c) cluster workstations with returns

▪ Today's office environment must be versatile, flexible and efficient while providing accessibility for team interaction. **The Next Generation Series**[®], a free-standing modular furniture offering, meets these requirements with features and design that are sensitive to your budget. **The Next Generation Series**[®] provides design solutions that are simple to configure as well as easy to install and maintain.

THE NEXT GENERATION SERIES®

shown in grey nebula and black with smooth t-mold/3mm edge

- a) "L" configuration workstation with adaptable peninsula work surface
- b) "P" peninsula workstation with extended corner and open shelf hutch
- c) "U" configuration dual workstation with mirror image extended corners

- An integrated wire management system is built into each workstation – not an expensive add-on. This patented system of grommets, cord trays and cavity leg with lift-off cover includes both vertical and horizontal wire management capabilities. These unique features on **The Next Generation Series**[®] allow for “No Tools” installation, as well as hassle-free reconfiguration.

shown in fusion maple and black with smooth t-mold/3mm edge

- a) extended corner with radiused peninsula
- b) "L" group with workstation, over top flipper door hutch and return
- c) corner workstation with flanking workstations

▪ **The Next Generation Series®** allows you to meet all of your organizations furniture needs. From individual workstations to multi-person clusters, from task-oriented corner configurations to executive "U" groups, this series offers you complete design freedom. A broad selection of colors, edge treatments and paint finishes insures aesthetic compatibility with existing spaces or those "on the drawing board". Whether you are working in an open setting with a panel system or with individual offices, **The Next Generation Series®** is the right solution for the way you work today.

THE NEXT GENERATION SERIES®

Center drawer is constructed with contoured sides for safety.

The suspended box-file pedestal is central locking and utilizes ball bearing slides on file drawer.

Wire management cord trays allow cords to flow neatly and safely under the worksurface.

Standard grommets allow cords to flow side-to-side and back-to-back between workstations.

Fully articulating arm with built-on wrist rest allows proper ergonomic keyboard placement.

Mobile pedestals in file-file¹, box-file², and box-box-file³ configurations. Drawers feature full extension, ball bearing slides.

A broad array of corner and connector wedges in square, rectangular and radius shapes is available.
